

Benefits

1. increases the performance level of gasoline engines for sustainable driving
2. reduces emissions and fuel consumption
3. extends the life of the fuel system

Product Description

BIZOL Gasoline System Clean+ g80 is a fuel additive Made in Germany especially developed for maintaining the entire fuel system. Low or inconsistent fuel quality can cause carbon deposit build-up, inefficient ignition and combustion as well as poor power output. **BIZOL Gasoline System Clean+ g80** effectively cleans the entire fuel system, particularly injectors and valve seats, and prevents from corrosion. It protects the catalytic converter and is suitable for all gasoline engines and fuel qualities (E5, E10 or E85). The regular use of this unique fuel additive leads to lower fuel consumption, noticeably smoother engine run and increased operational reliability.

Available Packages

250 ml	250 ml
Art. 98880	Art. 8880

Technical Data

Name	Value	Method
Appearance	slightly brown, clear	
Density at 15 °C	830 kg/m ³	DIN EN ISO 12 185

How to use

A 250 ml can is efficient for up to 70 litres of gasoline fuel. Just pour it in the fuel tank before filling, it is self-mixing. For preventive maintenance use every 3rd tank filling. In countries with low fuel quality recommended for continuous use.
