

Benefits

1. reduces exhaust emissions
2. extends the life of the exhaust aftertreatment system
3. improves fuel combustion

Product Description

BIZOL Catalytic System Protect+ g82 is a fuel additive Made in Germany especially developed for protecting the entire catalytic system and Gasoline Particulate Filters (GPF). Low or inconsistent fuel quality can cause inefficient combustion and reduced performance of the exhaust aftertreatment system. **BIZOL Catalytic System Protect+ g82** improves the combustion of the fuel and optimized thereby the performance of the catalytic converter as well as protecting the Gasoline Particulate Filter from clogging with soot. The regular use of this unique fuel additive leads to lower fuel consumption, extended service life of the exhaust aftertreatment system and reduced exhaust emissions.

Available Packages

250 ml
Art. 8011

Technical Data

Name	Value	Method
Appearance	slightly brown, clear	
Density at 15 °C	850 kg/m ³	DIN EN ISO 12 185

How to use

A 250 ml can is suitable for up to 70 liters of gasoline fuel. Just pour it in the fuel tank before filling as it is self-mixing. For preventive maintenance use every 3rd tank filling. In countries with low fuel quality recommended for continuous use.
